Economics of Feeding Milk Replacer

Volume	Type	Protein	Cent per Ltr
300 litres	Whole Milk	-	30.00c
300 litres	Milk Replacer	22%	22.50c
300 litres	Milk Replacer	26%	27.50c

The above table is based on feeding 300 litres of whole milk/milk replacer over an eight week period with whole milk costed in at 30 cent per litre.

As the table shows, feeding 22% product will save €22.50 per calf which would save you **€1,125 per 50 calves.**

26% product would save **€375 per 50 calves.**

Milk replacer also has the following advantages:

- Consistency of product
- No antibiotic resistance build up
- Ideal for automatic feeders & contract rearing
- No disease pass on from the mother e.g. (Johnes's disease)
