PREVENTION FOR PROFIT

FEED FOR 6-8 WEEKS BEFORE CALVING

053 92 36 2456 CALL OUR TEAM

FEED MILK REPLACER AND SECURE PROFITS

HUGESAVINGS TO BEMADE

Volume	Type	Protein	Cent per Ltr
300 litres	Whole Milk	-	63c
300 litres	Milk Replacer	24%	34.5c
300 litres	Milk Replacer	26%	340c

The above table is based on feeding 300 litres of whole milk/ milk replacer over an eight week period with whole milk costed in at 63 cent per litre.

As the table shows, feeding 24% product will save €85 per calf which would save you €4250 per 50 calves.

26% product would save €3450 per 50 calves.

ADVANTAGES:

1. CONSISTENCY OF PRODUCT
2. NO ANTIBIOTIC RESISTANCE BUILD UP
3. IDEAL FOR AUTOMATIC FEEDERS & CONTRACT REARING
4. NO DISEASE PASS ON FROM THE MOTHER E.G. (JOHNE'S DISEASE)

Improving animal health with mineral technology OrbVie Portable System

What is it?

The OrbVie portable system is a refillable, battery-powered 5-litre mineral dispenser that delivers precision mineral dosing to any size herd. It does not need a mains power supply. It is a mobile, single, self-contained sealed Orb that has no leads or wires. It contains a long-life rechargeable battery (One charge lasts 2 months+) This is dropped into a single water trough releasing the liquid mineral blend into the drinking water below. It is suitable for use in sheds or in fields.
